

Papeles Andinos S.A.S.

Digital Transformation Plan

A modern roadmap to grow faster, sell smarter, and work better — built by a team of 4 developers for a trusted Bogotá family business.

The Challenge We're Solving

Papeles Andinos operates **5 physical stores** across Bogotá — in Suba, Kennedy, and beyond. But today's market demands more than a great physical presence.

No Online Store

Customers can't buy remotely. Every sale requires a physical visit, limiting reach and revenue.

Manual Inventory

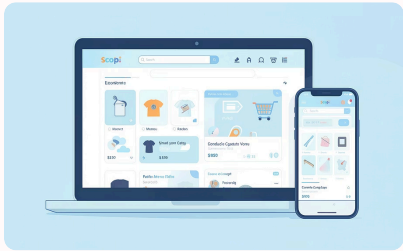

Products are counted by hand across all stores — slow, error-prone, and costly.

Weak Digital Presence

Large competitors dominate online. Without a digital strategy, the gap keeps growing.

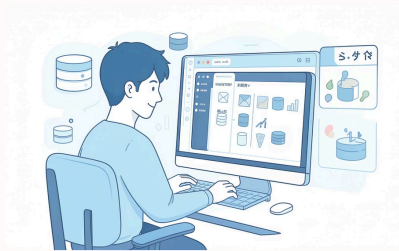

Our Solution: A Complete Digital Platform

Three integrated tools designed to be powerful for the business — and simple for the team to use.

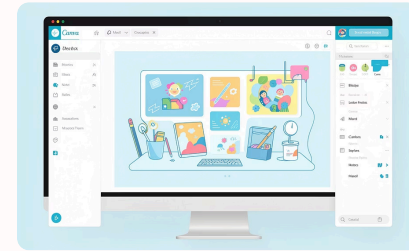

Online Store

A fast, secure website built with **PHP & Laravel**. Customers can browse and buy paper products and office supplies from their phones — anytime.

Inventory & Invoicing System

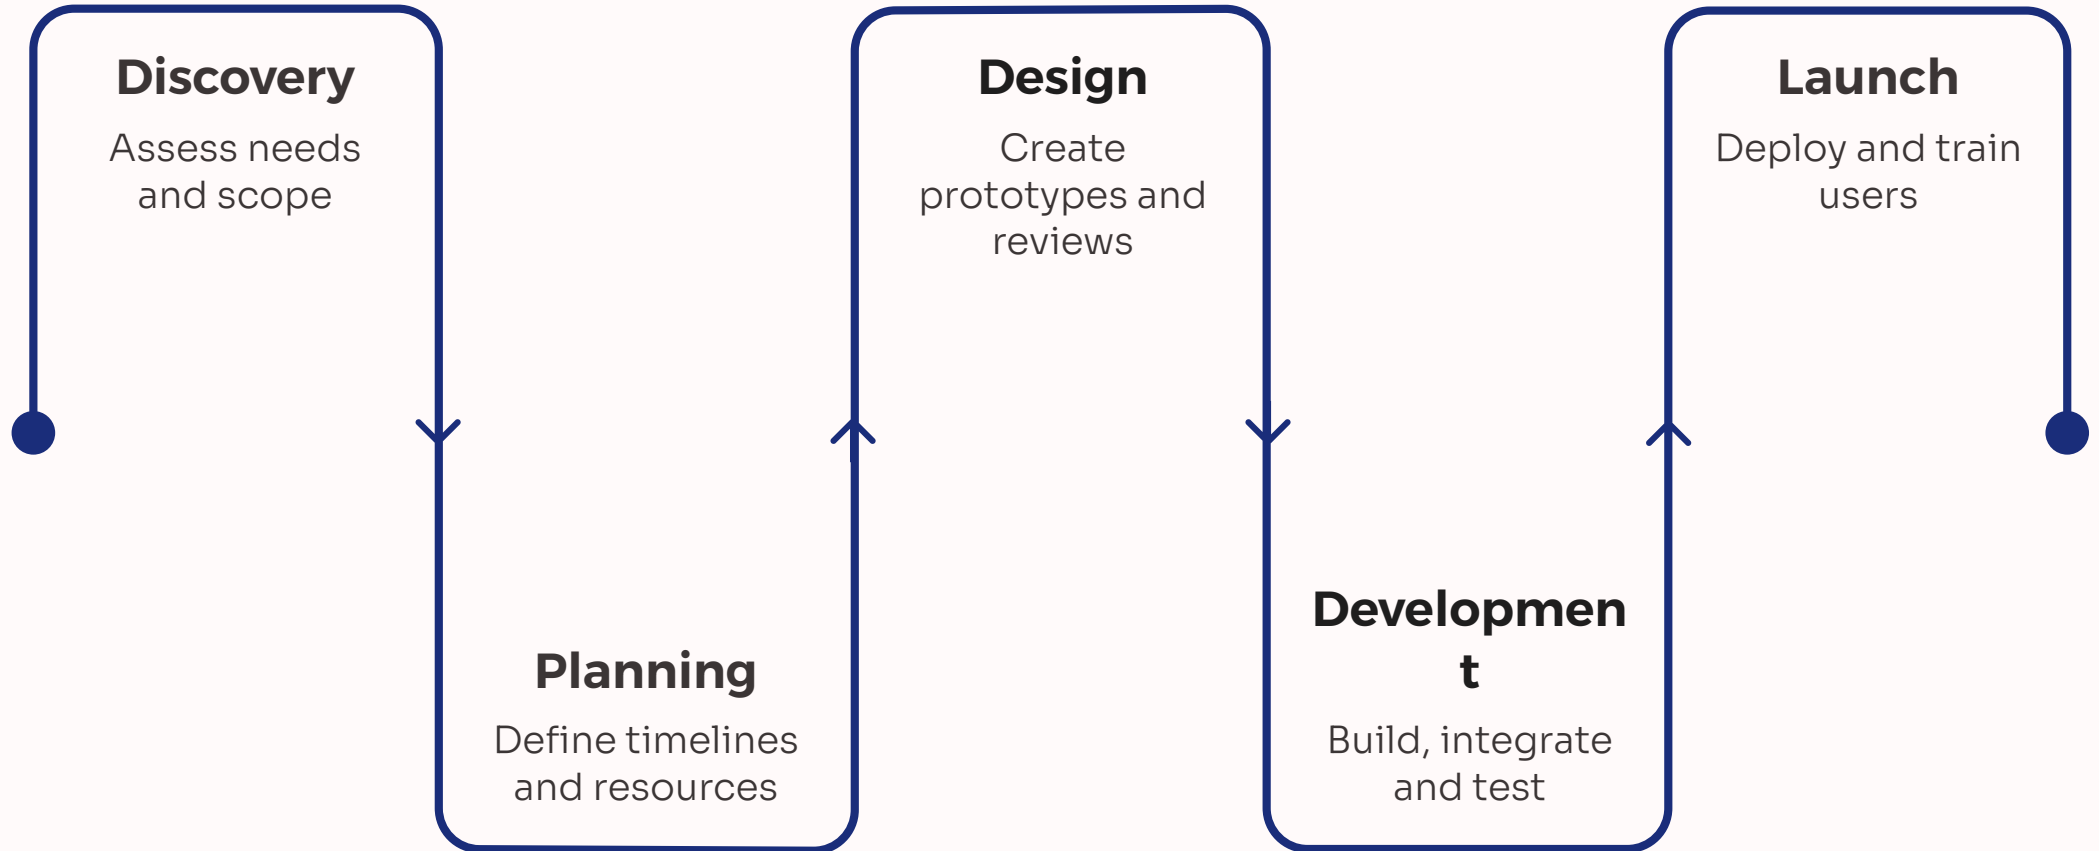

Built with **SQL** and coded in Visual Studio Code. Stock updates automatically across all 5 stores. Electronic invoices sent directly to **DIAN**.

Professional Design

Using **Canva**, we create an attractive visual identity for the website and social media — making Papeles Andinos stand out from competitors.

How We'll Build It

Our 4-developer team follows a structured, transparent process — keeping Papeles Andinos informed and in control at every stage, from first design mockup to full system launch.

The Results You Can Expect

24/7

Online Sales

Your store never closes — customers buy any time, any day.

5

Stores Synced

Real-time inventory across every location, automatically.

0

Manual Errors

Automated stock counts and digital invoicing eliminate mistakes.

A Stronger, More Competitive Business

With a modern online store, automated operations, and a polished brand identity, Papeles Andinos will be ready to compete with the largest players in the Bogotá market — and win.

✓ More sales. Total control. A modern image.

Meet the Team

We are **4 software developers** committed to the success of Papeles Andinos S.A.S. We bring technical expertise and a deep understanding of what family businesses need to grow in the digital age.

Our Commitment

Simple tools. Real results. A system built for your team to use with confidence — no tech background required.

Our Stack

PHP · Laravel · SQL · Visual Studio Code · Canva — proven technologies chosen for reliability and ease of use.

Next Step

Let's schedule a kickoff meeting to align on priorities, timelines, and first milestones. The transformation starts now.
